

## **THE BENEFITS OF LEARNING ENGLISH**

Nowadays, it's very important to learn English. If we are talking about advantages you get if you can speak English I see four main aspects. They are educational, cultural, social and business.

Educational aspect is very important nowadays, because of "Lifelong learning" concept, which is used in every developed country. If you want to be a good professional you need to continue your education. Actually, it must never be stopped. There are a lot of textbooks written and translated in English. Besides that, you can study abroad, if you speak English well. There are a lot of bachelor's and master's university degree programs in every European country, not to mention MBA programs.

Cultural aspect is significant too. You can read books, listen to music and watch movies in English. Of course, you can often find a translation, but it often doesn't convey what exactly the author meant.

Social aspect is clear. Thanks to English you can communicate with people from all over the world. It's great because it was almost impossible for average people for centuries. Now, when people from Ukraine, Germany, Brazil, India, Canada and any other country meet each other they can communicate. And this opportunity is given by the most popular international language which is English.

Last but not the least it's business aspect. You can not only find a better paid job if you speak English. No matter, whether you work for somebody or you are your own boss you have more opportunities with English. You can make international contacts and do business worldwide without the help of translators. Isn't it great?

So, it's clear that English is the language of opportunities. The only question is: "Will you take advantage of these opportunities?" And for sure it's only up to you.
